$25 \div 5 = 5$

4. Ali had 60 sweets. He shared them between 5 friends. How many sweets did they get each?

$60 \div 5 = 12$

12 sweets

5. Karl has 30 cupcakes. There are 5 cupcakes on each plate.

How many **plates** are there?

$30 \div 5 = 7$

7 cupcakes

6. Which number cannot create equal groups of 2 and 5? Explain why.

| 30 | 15 | 20 | 10 |

15 cannot create equal groups of both 2 and 5 because it is an odd number. It is not in the 2 times table. It is only in the five times table. 10, 20 and 30 can be divide by 2 and 5.
