

Wednesday 24th June 2020

you do not need to print this, just draw it in your book

LO: to create an explanation comic strip.

Today you will be making a comic strip to show the water cycle. The top boxes (labelled with the stages) need to have a picture drawn in. The bottom boxes (First, next, then..) need to have a sentence to explain what happens in that stage of the cycle. One has been done for you.

Precipitation 	Infiltration	Evaporation	Condensation
<p>First, <i>the clouds become too heavy and the water droplets fall to the ground as rain or snow.</i></p>	<p>Next</p>	<p>Then</p>	<p>Finally</p>
