## Wednesday - Practical Discovery Sharing

Share 6 between 2 people is $\qquad$ $6 \div 2=$ $\qquad$

Share 8 between 4 people is $\qquad$ $\longrightarrow 8 \div 4=$

Share 10 between 5 people is $\qquad$ $\longrightarrow 10 \div 5=$ $\qquad$

Share 12 equally between 3 people is $\qquad$ $12 \div 3=$ $\qquad$

Share 18 between 2 people is $\qquad$ $\longrightarrow 18 \div 2=$ $\qquad$

Work out the total to these number sentences:
$12 \div 4=$ $\qquad$
$9 \div 3=$ $\qquad$
$15 \div 5=$ $\qquad$
$14 \div 2=$ $\qquad$

## Maths Investigation

Start with either 12, 18, or 20 counters/pasta/pebbles.
Find out can you share them equally between $1,2,3,4,5,6,7,8,9$ and 10 people?
Write the number sentence for each that you can!
