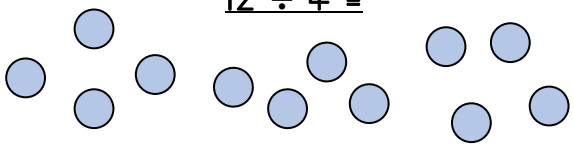
1) Solve the following calculations by drawing groups of the divisor around the counters and then completing the sentences below.

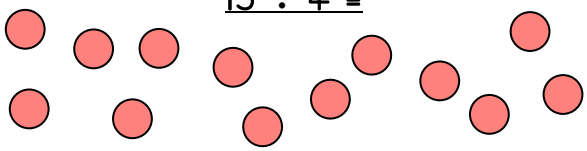
Level 1

12 ÷ 4 =



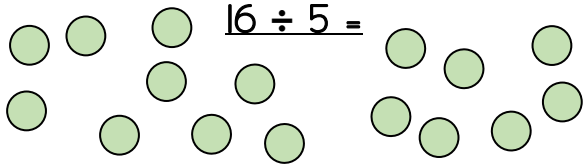
There are ___ counters. They are divided into groups of ___. There are ___ groups.

13 ÷ 4 =



There are ___ counters. They are divided into groups of ___. There are ___ groups. There is a remainder of ___.

16 ÷ 5 =



There are ___ counters. They are divided into groups of ___. There are ___ groups. There is a remainder of ___.

2) Draw numberlines to solve the equations below.

a) 17 ÷ 5 = ___

17

b) 21 ÷ 4 = ___

21

c) 16 ÷ 6 = ___

16

3) Answer the following calculations.

a) 9 ÷ 4 = _____ b) 10 ÷ 4 = _____ c) 11 ÷ 4 = _____

d) 22 ÷ 6 = _____ e) 53 ÷ 10 = _____ f) 27 ÷ 4 = _____

g) 43 ÷ 7 = _____ h) 58 ÷ 8 = _____ i) ____ ÷ 9 = 7 r 4

4) Shumba says: *"32 ÷ 10 = 2 r 12"*.

Prove that Shumba is wrong.
