Using your work from yesterday (the 10 things you described) and the video to help you, **write a setting description about Pandora.**

I have used the following two images from the video because I find them the most inspiring. You might choose to do a different part of the video.

You should write about a page, using paragraphs.

You could start like this if you're not sure:

Against a backdrop of planets and moons, a long vine draped in moss and grass strung its way across the sky. Miniscule dots darted across it like a mini family of ants. Hovering islands dripping in nature drifted aimlessly through the blue, closing in on the landscape. Wispy white clouds decorated the sky, hiding moons and planets from view momentarily, its mist crept from below, from within the mountain ranges.

Jagged tops of mountains lined the horizon, providing a way for the avatars darting from vine to vine in search for food and adventure. Swinging from side to side, the vines had a mind of their own: the avatars steadying themselves as they ran. A fall from this height would cause a plummet into the abyss; the emptiness which no-one knew the depth of. A steady breeze, swept through the land, providing coolness to the hot atmosphere deprived of shade.
