LO: calculate the area of a parallelogram

The formula to calculate the area of a parallelogram is base x height.

A) Look at the shapes to the right. Explain how the image can demonstrate that the formula for the area of a parallelogram is the same as the formula for the area of a rectangle.

B) Calculate the area of the following parallelograms

C) Find the missing lengths.

Area = 15cm^2

Area = 12m^2

D) Here is a rhombus inside a rectangle.

Calculate the area of the rhombus.
