

Monday – Guess the animal

1. Can you read the description of the animal and then draw it? What do you think it is?

This animal walks on 4 legs. At the end of each leg are large, heavy paws which each have 5 razor-sharp claws. It has a long, curved tail. This animal has a triangular shaped, soft pink nose with long sensitive whiskers on either side. It has two large emerald green eyes. Its mouth is full of knife-like teeth with four huge teeth at the front called the canines. The bottom of its face and its neck is covered with thick white fur. The rest of its fur is orange with bold, black stripes running down its body.
