

Monday

The Robot got to his feet and danced a creaking, clanking dance.

Creaking and clanking are noises that metal makes when it is moved.

1. Look at the words below. Which ones would you choose to describe how a robot moves?

loudly or quietly

smooth or stiff

quickly or slowly

bendy or rigid

metallic or velvety

gently or jerkily (stopping and starting suddenly)

metallic or velvety (soft material)

tiptoe or march

rattling or silent

stomp or run

2. Can you watch the clip of this robot?

<https://www.youtube.com/watch?v=JrxSxkDpcPs>

Can you write four sentences to describe what the robot was doing?

Remember to use the words above to help you. You can describe how he moved through the forest, sat, spoke or picked things up.

Example:

The robot sat down slowly and stiffly with a metallic creak.
