

Monday (Recap)

Use the **partitioning method** to work out the answer to these questions.

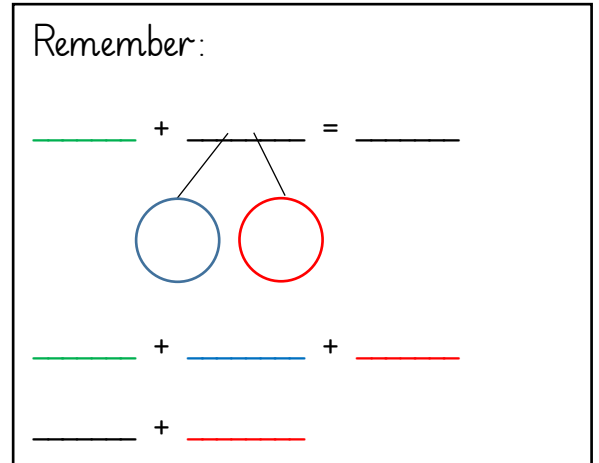

$$1) \quad 36 + 28 = 64$$

$$2) \quad 54 - 39 = 15$$

$$3) \quad 82 - 45 = 37$$

$$4) \quad 69 + 17 = 86$$

$$5) \quad 91 - 18 = 73$$

Now try these missing number problems.

$$9 - 6 = 3$$

$$20 + 30 = 50$$

$$70 - 40 = 30$$

$$45 + 10 = 55$$

$$72 - 7 = 65$$

Remember:

_____ + 2 = 5
2 + _____ = 5
5 - _____ = 2

Take away!
5 - 2 = 1

Add!
_____ - 2 = 3 → 2 + 3 = 5

I think the missing number is 0.

$$80 - 40 = 40$$

What mistake have I made? The mistake made is that I subtracted to work out the missing number when I should have added the numbers given.
