What number sentences are represented? Each flower has 5 Petals.
a)

There are 4 equal groups of 5
There are 20 petals altogether.
$4 \times 5=20$
b)

There are 6 equal groups of 5
There are 30 petals altogether. $6 \times 5=30$

Fill in the missing numbers in these number tracks. Look closely for at the ones for a pattern!

| a) | 0 | 5 | 10 | 15 | 20 | 25 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

| b) | 30 | 35 | 40 | 45 | 50 | 55 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  |  |  |  |  |  |  |
| c) | 65 | 70 | 75 | 80 | 85 | 90 |

d) What do you notice? I notice that numbers in the $5 x$ tables have 5 or 0 ones.

Work out the missing numbers in these numbers sentences.
a) $5 \times 5=25$
b) $10 \times 5=50$
c) $11 \times 5=55$
d) $5 \times 6=60$
e) $4 \times 5=20$
f) $15=3 \times 5$

Remember if you are stuck you can count with your fingers to help you OR draw an array:

For example: $2 \times 5=10$

Do you agree? Explain your reasoning.

You may want to use this table to show your working out:

| Even Numbers |  |  | Odd Numbers |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 10 | 20 | 30 | 40 | 15 | 25 | 35 |
| 50 | 60 |  | 55 | 5 |  |  |

I agree because some numbers in the 5x tables for example 20 have zero ones and can be shared equally between 2 people so they are even.
