Tuesday

Today we are going to be focusing on finding the difference. When we <u>find the difference</u> and work out <u>how much more or less</u> someone has, we need to subtract. <u>Remember to take away from the bigger number</u>!

---

1) Three children have saved their pocket money. Here is what they each have in their piggy banks:
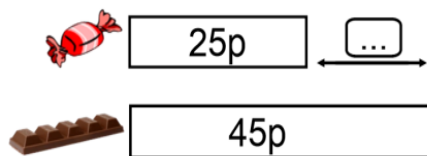

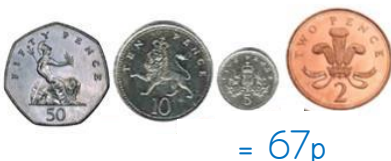

Charlie   Jessica   Becky

a) How much more does Jessica have than Becky?   £11 - £6 = £5. The answer is £5.
b) What is the difference between Charlie's and Jessica's amount of money?   £15 - £11 = £4
c) What is the difference between Becky and Charlie's savings? £15 - £6 = £9

25p

45p

2) Work out <u>the difference</u> between the price of the sweet and chocolate and fill in the missing numbers in the number sentence.

| 45p | – | 25p | = | 20p |

---

3) Bilal has these coins. He wants to buy a toy car for 80p. <u>How much more</u> money does he need?

80p – 67p = 13p

Bilal needs 13p more.

80p

= 67p

---

4) Find the difference between these amounts.

a) Bob has 63p. Amy has 75p. The difference is 12p

b) Roy has £14 and Sita has £30. The difference is £16

c) Mr Cook has £2 and 50p. Miss Skinner has £1 and 50p. The difference is £1

d) Miss Goodwin has £10 and 20p and Miss Campbell has £9 and 10p. The difference is £1 and 10p

e) Mr Rossetti has 80p and Miss Mahamood has £1. The difference is 20p (because 100p = £1 remember!)

---

5) Mr Webster tried to find the difference between £35 and £50.

What mistake has he made? The mistake is Mr Webster added the numbers when he should have subtracted to find the difference. 50 – 35 = £15

He said "35 + 50 = £85 so £85 is the difference."
