

Tuesday

Can you help me with my day by deciding if I need to **add or take away**?

I have 24 pink flowers in my garden and 7 yellow flowers in my garden.

How **many more** pink flowers than yellow flowers do I have?

$$24 - 7 = 17 \text{ more pink flowers}$$

I ate 12 chocolates yesterday and 14 chocolates today.

How many chocolates have I eaten **altogether**?

$$12 + 14 = 26 \text{ chocolates}$$

In my garden I saw 17 ants and 32 woodlice.

What is the **difference** between the number of ants and woodlice?

$$32 - 17 = 15$$

I was making a cake and put in 95 grams of flour and 58 grams of sugar.

How **much less** sugar did I put in compared to flour?

$$95 - 58 = 37 \text{ grams less sugar}$$

On Friday I exercised for 19 minutes. On Saturday I exercised for 25 minutes and on Sunday I exercised for 16 minutes.

How long did I exercise for **in total**?

$$19 + 25 + 16 = 60$$

$$60 \text{ minutes} = 1 \text{ hour}$$
