

Wednesday

Silent K

Rule: the silent k comes before n in words. Words beginning with kn originally came from German languages but could not be pronounced so are silent now. There is no rule to decide to use only n or kn for spelling – you will just learn the correct way with practise!

Words to copy – Remember to repeat each word right across the line in neatest handwriting!

Can you work out the words shown by these pictures and use the silent k rule to spell them correctly?
