

1. Complete the questions:

a) $3 \times \underline{\quad} = 18$

c) $33 \div \underline{\quad} = 11$

e) $12 \div 3 =$

b) $8 \times \underline{\quad} = 32$

d) $40 \div 10 = \underline{\quad}$

f) $21 \div 3 =$

2. There are 27 cakes.

A box can hold 3 cakes.

How many boxes of 3 cakes can be filled?

3. Draw a picture to show 18 divided by 3.

4. A farmer has 24 apples.

He has 4 bags.

How many apples will go in each bag?

5. There are 32 counters in this array.

Write the division calculations that can go with it.

Numbers that follow each other when you count are called consecutive numbers.

Three consecutive numbers form a staircase.

Here is 4, 5 and 6.

When you add 3 consecutive numbers they can always be divided by 3.

Is this correct?

e.g. $4 + 5 + 6 = 15$

$15 \div 3 = 5$
