Remember **product** means numbers are **multiplied together**.

Kim rolls three 6-sided dice.

The product of her numbers is 60
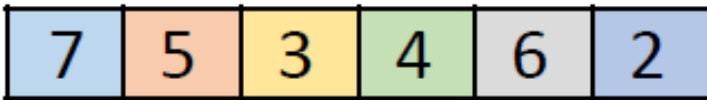

a) What numbers could she have rolled?

_____

_____

b) How many different ways could Kim have made 60?

Make the target number of 84 by multiplying 3 of these digits together:

| 7 | 5 | 3 | 4 | 6 | 2 |

Then multiply the remaining three digits together, what is the product of these numbers?
