

CATERPILLAR

craft for kids

Step by Step Instructions

Punch out a bunch of circles using the circle puncher and fold the circles in half.

We used 7 circles to form one ball.

Feel free to use more if you want to.

Apply some glue on one side of the paper halves.

Glue the paper halves together.

ttach the ends together and you have a ball formed.

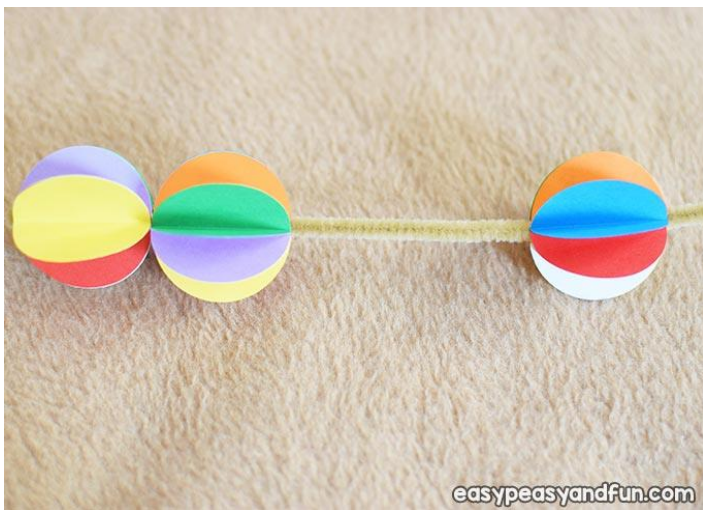

Make 6 more colorful balls.

Take the chenille stick and make a small hook at one end.

Start threading the colorful balls on the chenille stick.

This is how your project should look by now.

Wrap the other end of the chenille stick around itself to secure the balls from falling out.

Punch one circle and attach the googly eyes on.

Draw a caterpillar mouth.

Punch a few more circles.

Apply some glue on each of them, glue them together, then attach the face on top of them.

Attach the caterpillar's head to the body.
